

Steve Smith's prior questions on the Lobbyist pay back chart that he would still like answered.

d) that an explanation be provided as to the nature of the Paramedic/Detective Double Taxation funding received.

The 2000-2001 Budget book indicates in the Transmittal Letter "The station will be staffed beginning next budget year from revenues received through the new paramedic tax. Recent legislation moved these funds from the Salt Lake County's general fund to the general funds of all municipalities within the County. The new paramedic tax will also allow us to put firefighters/paramedics in all our current stations (and our new fifth station) and fully staff our flying squad."

Another similar adjustment occurred for Detective services in a following budget. It was also removed from the County's General Fund and applied to all cities within the County. These transfers were a direct result of lobbying efforts at Salt Lake County and the Utah State Legislature.

e) that the source and nature of the Amphitheater future revenue be described and the GL account code to which the funding is to be coded be indicated.

The Innkeeper Bonds in Fund 3106, page 247, in the Budget Book indicates a grant received from the County annually of \$456,500. This is used to pay off the Innkeeper Bonds that were issued in 1998 for the construction of the Amphitheater and Lone Peak Park (See page 27 of the Budget Book). This annual transfer is also a direct result of lobbying efforts at Salt Lake County.

f) that any pass-throughs or spending commitments related to any of the listed funding/benefits be described as to their nature, intended recipient(s), and the years in which they were or are to be expended.

We continue to work on this.
